Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS paper filed July 19, 1999 has been received and placed in the record of file.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

5. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaneko (U.S. Patent No. 6,167,562).

Art Unit: 2671

As per independent claim 1, Kaneko teaches a method and system for creating an animation program comprising a step of generating a sequential character image by connecting a plurality of unit image groups which are respectively guaranteed to indicate one communication information and displaying the sequential character image (Fig.20, 211, 213).

As per claim 2, Kaneko further teaches the claimed invention at Fig.27, col.3, lines 17-64).

Due to the similarity of claims 3-14 to claims 1-2, they are rejected with a similar rationale.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. The reference of Hugh (U.S. Patent No. 6,256,032) is cited because it shows a method and apparatus for organizing and processing information using digital computer.

b. The reference of Hayes, Jr. et al (U.S. Patent No. 6,283,858) is cited because it shows a method for manipulating images.
